SUMMARY

Committed to delivering exceptional user experiences while adhering to best practices in web development. Seeking to leverage my expertise in full-stack development to contribute to innovative projects and drive continuous improvement within a dynamic team environment.

SKILLS

Technical Skills

Angular, TypeScript, JavaScript, Node.js, MongoDB, Rxjs, NgRx, express, Bootstrap, CSS, Angular Material, Tailwind, Reactjs, Vue.js, Jest, Jasmine

Tools

git, Azure, Bitbucket, CloudFlare Pages & workers, AWS s3, VPS, RazorPay, AWS EC2, Vs Code

AI Tools & Agents

Cursor, Trae, Antigravity, ChatGpt, Gemini, Github Copilot

PROFESSIONAL EXPERIENCE

Associate/Senior software Engineer

Unified Infotech

Jun 2024 - Mar 2026

Boards And Beyond(McGraw Hill)(Jun, '24 - Dec, '24)

- Implemented comprehensive **accessibility features**, including narrator support, within the Learners application to significantly enhance user experience and meet compliance standards.
- Integrated **Pendo analytics** into the Learners UI to gather crucial user behavior data, enabling data-driven decisions for product optimization and feature development.
- Led the implementation of **Jest-powered unit testing** in Angular, ensuring robust test coverage for services, modules, and components across legacy and new implementations.
- Spearheaded comprehensive research and development (R&D) for the critical **migration of CKEditor4 to CKEditor5**. Architected and implemented a custom solution for direct **integration with AWS S3 file manager**, successfully eliminating the need for costly CKFinder or CKBox licenses.

CQFluency(Feb, '25 - Sept, '25)

- Engineered and optimized **critical enterprise workflows (job, order, quote)**, incorporating robust status transitions, view-only modes, comprehensive submit validations, and real-time UI state synchronization.
- Managed and optimized complex pricing and **CAT (Computer-Assisted Translation) interface logic**, resolving critical issues related to price list propagation, recalculation discrepancies, multi-currency handling, and **TM analysis** consistency across order and quote management systems.
- Fortified robust **Role-Based Access Control (RBAC)** mechanisms by resolving complex permission-driven UI behaviors, secure **impersonation flows** and session handling, significantly enhancing platform security.
- Optimized comprehensive **file and folder management functionalities**, rectifying critical issues in **upload/download processes, source-target folder navigation**, improving data accessibility and user efficiency.

Sun Social Network(Oct, '24 - Mar, '26)

- Engineered and stabilized end-to-end **user onboarding flows**, including OTP signup, comprehensive profile setup (skills, interests), and completion checks, ensuring robust data acquisition and **high profile completeness** rates.
- Optimized feed and interaction reliability** across core modules (home, dashboard, posts, likes, comments, replies) by resolving critical data refresh and state synchronization issues, resulting in a **significant reduction in user-reported slowness and interaction failures**.
- Deployed real-time **push notifications** leveraging **Google Firebase** for post reactions and comments, significantly enhancing user engagement and overall application interactivity.
- Designed and integrated a comprehensive Points Management System, providing users with clear visibility into earned and redeemed points, thereby enhancing user engagement and transparency within the reward program.

VOZ LEAD(Oct, '24 - Mar-'26)

- Led the implementation of secure note-taking and download capabilities for customer organizations, enforcing HTTPS standards and remediating Highcharts 8.2.2 vulnerabilities via migration to ng2-charts.
- Successfully migrated the entire frontend application from **Angular 8 to the latest Angular 21** version, leveraging modern framework features, enhancing performance, and ensuring long-term maintainability.

Associate IT Consultant

ITC INFOTECH
Mar 2022 - Mar 2024

Mondee Inc.(USA)

- Optimized and scaled the core Hotel booking module.
- Integrated Google Places API for advanced location services.
- Developed advanced search features and client-side trip cancellation.
- Implemented authentication, Guards, Resolvers, and HTTP Interceptors.
- Led Internationalization (i18n) implementation for multiple languages/currencies.

Systems Engineer

TATA Consultancy Services
Mar 2018 - Mar 2022

- **OLD Mutual (SA):** Development of cross-browser scalable application. Migrated Angular 4 to 8. Responsible for Code Optimization and tree shaking.
- **CITI BANK(Global) Migration Demo:** Migrated legacy JavaScript to Angular 2 and Adobe Flex to Angular 7.
- **CITI Bank (Singapore):** Migrated profiling application from XML to Angular 12. Mentored freshers.

PROJECTS

Presmistique - Resume Builder

Designed and developed a full-stack **resume builder** platform enabling users to **create, parse, and optimize resumes** through a template-driven interface. Implemented **AI-powered resume parsing, keyword and tone enhancement, and ATS score analysis** using **Google Gemini 2.5 Flash**. Owned end-to-end deployment and production support by designing a CI/CD pipeline using Cloudflare Pages, Vercel, and Render, deploying the backend on an InterServer VPS for high availability, and managing live production at <https://presmistique.in>

Technologies: React, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs, Google Gemini 2.5 Flash (Resume Parsing, ATS Score Analysis and enhancements), Puppeteer, Chromium, Cloudflare Pages, Vercel, Render, InterServer VPS, CI/CD Pipelines, Nginx, Linux, Git, GitHub
<https://presmistique.in>

Ckeditor5 - with Custom File manager Plugin

Designed and deployed an optimized custom **CKEditor 5** build featuring proprietary in-house **file upload and advanced asset management** capabilities, fully integrated with **Amazon S3** and **Cloudflare R2**. This strategic implementation successfully eliminated costly dependencies on expensive solutions like CKFinder and CKBox.

Technologies: JavaScript, CKEditor 5, Tailwind CSS, Webpack, Amazon S3, Cloudflare R2, Custom Plugin Development
