PROFILE SUMMARY

Full-Stack Software Engineer with 7+ years of experience delivering scalable enterprise solutions across FinTech and EdTech. Expert in **Angular (v21/Signals), React, and Node.js**, with a proven track record in system optimization, complex migrations, and containerization (Docker/Nginx). Currently leveraging an employment transition to spearhead full-time R&D in **real-time AI streaming architectures and developer tooling (MCP)**.

SKILLS

Frontend Development:

- Angular
- Reactjs
- TypeScript
- JavaScript
- Rxjs
- NgRx
- Redux
- HTML5
- Tailwind CSS
- Firebase
- Angular Material
- Bootstrap
- CSS, SCSS
- Figma MCP

Back-end Development:

- Node.js
- Express.js
- REST APIs
- MongoDB
- WebSockets(Socket.io, WS)

Cloud and Deployment:

- AWS S3, Lambda, EC2
- Cloudflare Pages, DNS, R2
- Docker
- CI/CD Pipelines
- Nginx
- Vercel
- Render
- InterServer VPS

Software Engineering Practices:

- Webpack
- ESLint
- GitHub
- Custom Plugin Development
- Code Refactoring

WORK EXPERIENCE

Senior software Engineer - Unified Infotech

Jun 2024 - Mar 2026

- Led end-to-end frontend modernization and feature engineering across multiple enterprise platforms, improving performance, scalability, and maintainability using **Angular, RxJS, and NgRx**
- Enhanced **accessibility(A11y)** compliance and user experience in McGraw Hill's Boards and Beyond platform by implementing narrator support and accessibility features aligned with standards.
- Enabled data-driven product decisions by integrating **Pendo** and **Churnzero** analytics into the Learners application, capturing user behavior insights for feature optimization.
- Spearheaded migration of CKEditor4 to CKEditor5, including development of a custom **S3-integrated file manager** using **JavaScript** and **Webpack5**, eliminating dependency on third-party paid solutions.
- Modernized a legacy Angular 8 application by migrating it to **version 21**, resulting in **superior load times, minimized bundle sizes**, and the implementation of **robust security standards** across the platform.
- Strengthened platform security by implementing robust **RBAC**, secure **impersonation** flows, and improved session handling across enterprise systems.
- Optimized real-time user engagement systems by implementing **Firebase push notifications** and improving feed reliability, reducing interaction failures and latency issues.

Associate IT Consultant - ITC INFOTECH

Mar 2022 - Mar 2024

- Enhanced location intelligence by integrating **Google Places API**, enabling accurate search and improved user navigation experience.
- Developed advanced search and trip management features, including client-side trip cancellation workflows, improving user control and flexibility.
- Strengthened application architecture by implementing **authentication** flows, **route guards, resolvers, currency pipes**, input validation **directives** and **HTTP interceptors** for secure and efficient data handling
- Led **internationalization (i18n)** implementation, enabling multi-language and multi-currency support for global market expansion

Systems Engineer - TATA Consultancy Services

Mar 2018 - Mar 2022

- Delivered scalable, **cross-browser** enterprise applications for financial clients including Old Mutual and Citi Bank, ensuring high reliability and performance.
- Modernized legacy systems by migrating applications from **Angular 4 to Angular 8** and from JavaScript/Adobe Flex to Angular frameworks.
- Improved application performance through code optimization and tree-shaking techniques, reducing bundle size and load times.
- Migrated enterprise profiling systems from XML-based architecture to Angular 12, enhancing maintainability and scalability
- Mentored junior developers and supported onboarding, improving team productivity and code quality standards.

Project Management and Optimization:

- Accessibility Features(A11y)
- Internationalization and Localization(i18n & i10n)
- Performance Optimization
- User Experience Enhancement
- Security Checks
- Data-driven Decision Making

EDUCATION

Jan 2017
West Bengal University of Technology
B. Tech
GPA: 7.65

Jan 2013
Barasat P.C.S. Govt. High School
W.B.C.H.S.E(Higher Secondary)
GPA: 7.65

Jan 2011
Chandpara Dhakuria High school
W.B.B.S.E(Secondary)
GPA: 8.32

PROJECTS

Presmistique - Resume Builder

Built and deployed a full-stack resume builder platform enabling AI-powered resume parsing, ATS scoring, and content enhancement using **Google Gemini API**. Designed scalable backend and **CI/CD pipelines** using **Cloudflare Pages**, **Vercel**, and **VPS infrastructure**, ensuring high availability and production stability. Integrated **Puppeteer** based **PDF generation** and real-time resume optimization workflows, improving user experience and automation capabilities. Architected a secure, production-ready SaaS featuring **OAuth2 authentication** (Google/LinkedIn), a specialized **token-based monetization** system integrated with **Razorpay**, automated **SMTP notification workflows**, and robust **API rate limiting** to optimize infrastructure costs and service stability.

Technologies: React, Node.js, MongoDB, Tailwind, REST APIs, Gemini AI, CI/CD, Nginx, Linux
<https://presmistique.in>
<https://github.com/Pranayd555/resume-builder>

EVA AI — Full-Stack Real-Time Portfolio Assistant

- Architected a real-time portfolio assistant utilizing a Node.js backend and Gemini Live API over WebSockets for low-latency, token-by-token text streaming.
- Built a high-performance Zoneless Angular 21 UI using Signals and Web Workers to isolate IndexedDB caching off the main browser paint thread.
- Enforced zero-hallucination guardrails via explicit tool-gated function-calling to route queries locally through chunked markdown knowledge bases.

Technologies: Angular 21, NgRx, Node.js 22, Gemini Live API, WebSockets, Three.js, Docker, Nginx
<https://pranay.presmistique.in>
<https://github.com/pranayd555/portfolio-ai>

CodeLens Graph — Developer Tooling & AI Agent Context Optimization

- Developed a developer indexing tool that parses codebases into queryable knowledge graphs of cross-file symbols, definitions, and call hierarchies.
- Engine-mapped structural repositories using high-performance Tree-sitter WASM grammars backed by an in-process SQLite WASM database.
- Integrated a standardized Model Context Protocol (MCP) server providing deterministic context to AI agents, radically optimizing token budgets.

Technologies: TypeScript, Node.js, WebAssembly, Tree-sitter, SQLite WASM (sql.js), Model Context Protocol (MCP), Zod, esbuild
https://github.com/pranayd555/code_lens-graph

Ckeditor5 - with Custom File manager Plugin

Developed a custom CKEditor5 build using **Webpack5** with proprietary file management integrated with **AWS S3** and **Cloudflare R2**. Eliminated dependency on CKFinder/CKBox, significantly **reducing operational costs** and improving control over asset management.

Technologies: JavaScript, CKEditor5, Webpack, AWS S3, Cloudflare R2, Tailwind CSS
<https://github.com/Pranayd555/ckEditor5>
